

KNOT-TEC

WOOD REPAIR SYSTEM

... the power to perform

POWER
ADHESIVES

The **TEC 250** applicator plus our **TECBOND 7718/12** polyamide hot melt (**KNOT-TEC** System) has been specially developed for repairing knots and filling damaged wood surfaces.

For a fast and effective repair the **KNOT-TEC** System is the answer. Simply fill the knot hole or damaged surface with the **TECBOND 7718/12** molten adhesive (available in different colours, to match the wood: amber, beige, black and cola).

When the surplus glue has been removed, which can be done easily using a sharp chisel or cutting tool, you are then able to treat or paint the wood in the normal way.

The **KNOT-TEC** adhesive, reference **7718/12** is available in four colours to match most wood types. They are translucent amber, beige, black and cola coloured adhesive sticks.

The **TEC 250** is the ideal glue gun for dispensing the **TECBOND 7718** glue sticks. Compact in size and with its efficient heater housing, reaches operating temperature in approximately 5 minutes, (it is fitted with a P.T.C self regulating heater that can be operated in any facility from 100-240 volt).

The **KNOT-TEC** wood repair system is the most cost-effective system on the market today.

KNOT-TEC STARTER KIT Consisting of: metal carrying case, **TEC 250** glue gun, **TEC-MAT**, 2 x stainless steel blocks, a pack of 12 x 250mm (10") **KNOT-TEC** glue sticks (3 of each colour, black, tan, beige & cola)

**OPTIONAL FREE
STANDING METAL STAND
(PART NO. FFS003)**

This specially formulated Knot-Tec is a hard polyamide adhesive especially suited for products exposed to high and low temperature changes. Perfect for parquet flooring.

The **TECBOND 7718/12** (1/2") adhesive sticks come in a ten stick resealable foil pack, 10 packs to a carton (single colour).

The optional metal **TEC STAND** is ideal when the glue gun is being used on a work surface, making it convenient to return it to the stand after use. It can also be used when it is necessary to remove the integral stand to gain easier access into restricted areas when gluing.
